

About Us – Mako Mining Corp is a publicly listed gold mining, development and exploration company. The Company operates the high-grade San Albino gold mine in Nueva Segovia, Nicaragua, which ranks as one of the highest-grade open pit gold mines globally and offers district-scale exploration potential. Mako also owns the Moss Mine in Arizona, an open pit gold mine in northwestern Arizona. Mako also holds a 100% interest in the Eagle Mountain Project in Guyana, South America. **Mako US Corp (a subsidiary of Mako Mining Corp.)** is currently seeking a qualified person for the position of **Long-Range Strategic Mine Planning Engineer – Mining Projects**.

About this role – Long-Range Strategic Mine Planning Engineer – Mining Projects

Responsibilities

- Develop, review and update life-of-mine (LOM) plans to maximize resource value while ensuring operational practicality
- Conduct strategic mine design, optimization, and scheduling using advanced mine planning software
- Evaluate alternative development strategies to support business decisions and corporate objectives
- Collaborate with geology, geotechnical, processing, environmental, and operations teams to ensure integrated planning and risk management
- Provide input to reserves and resources reporting, ensuring compliance with JORC, NI 43-101, or other relevant reporting standards
- Perform scenario analysis, sensitivity testing, and trade off studies to optimize project economics
- Support budgeting, forecasting, and strategic studies (expansions, acquisitions, divestments, etc.)
- Identify and implement best practices, innovative technologies, and continuous improvement initiatives in mine planning
- Prepare and present clear, data-driven reports and recommendations to management and stakeholders

**The above duties and responsibilities are representative of the nature and level of work assigned and are not necessarily all-inclusive.*

Qualifications and Skills

- Bachelor's degree in mining engineering (or related discipline)
- 5+ years of mine planning experience, with at least 2 years in long range/strategic planning roles
- Strong knowledge of mine design, optimization, and scheduling for open pit and/or underground operations
- Experience with equipment selection and estimation
- Proficiency in mine planning software (e.g.: MinePlan, Deswick, Vulcan, Datamine, MineSched, Whittle)
- Strong analytical and financial modeling skills to evaluate mine economics
- Strategic thinking and long-term vision
- Strong problem solving and decision-making skills
- Collaboration and stakeholder engagement
- Attention to detail and commitment to safety and sustainability

- Continuous improvement mindset and adaptability to change
- Excellent communication skills with the ability to influence across disciplines and management levels
- Demonstrated ability to manage multiple projects and deliver under tight deadlines
- Commitment to safety, sustainability, and continuous improvement
- A valid driver's license
- A valid passport is required for international travel

Working Conditions

- Based out of Tucson office but will require frequent travel to mine sites
- Exposure to outdoor and mining environments, including open pit and underground settings
- May require FIFO / DIDO roster or extended stays during critical construction and operational phases

Why Join Us

- A unique opportunity to develop a new mine from concept to production
- Work alongside a collaborative, diverse, high-performing technical and safety-first team of professionals
- Be a part of a company committed to innovation, sustainability, and community engagement

What We Offer

- 401K plus company match
- Paid time off
- Health insurance
- Dental insurance
- Vision insurance
- Life insurance
