

About Us – Mako Mining Corp is a publicly listed gold mining, development and exploration company. The Company operates the high-grade San Albino gold mine in Nueva Segovia, Nicaragua, which ranks as one of the highest-grade open pit gold mines globally and offers district-scale exploration potential. Mako also owns the Moss Mine in Arizona, an open pit gold mine in northwestern Arizona. Mako also holds a 100% interest in the Eagle Mountain Project in Guyana, South America. **Mako US Corp (a subsidiary of Mako Mining Corp.)** is currently seeking a qualified person for the position of **Mechanical Engineer – Mining Projects**.

About this role – Mechanical Engineer – Mining Projects

Responsibilities

Project Engineering and Design

- Develop and review mechanical designs for crushing, milling, material handling, pumping, piping, and plant infrastructure systems
- Prepare technical specifications, design criteria, and engineering deliverables
- Prepare equipment selection, sizing, and layout for new mining and processing facilities
- Collaborate with multi-disciplinary teams (civil, operations and processing) to ensure fully integrated designs
- Manage MS Project Schedule

Construction and Installation

- Provide mechanical engineering support during construction and installation phases
- Review construction drawings, submittals, and contractor work to ensure compliance with specifications and standards
- Oversee mechanical equipment installation, alignment, and commissioning
- Support the execution of bid packages

Project Management Support

- Assist with cost estimates, scheduling, and progress tracking for mechanical scopes of work
- Contribute to contractor/vendor selection and manage technical aspects of procurement
- Support risk assessments, constructability reviews, and value engineering initiatives
- Provide project status reports and/or presentations

Commissioning and Handover

- Develop commissioning procedures for mechanical systems
- Support start-up, testing, and performance verification of mechanical equipment
- Ensure proper documentation, as-built drawings, and training are provided to operations and maintenance teams
- Move project from construction to commercial production

Safety and Compliance

- Ensure all mechanical designs meet relevant codes, standards, and regulations
- Promote safe construction practices and participate in safety reviews (HAZOP, HAZID)

**The above duties and responsibilities are representative of the nature and level of work assigned and are not necessarily all-inclusive.*

Qualifications and Skills

- Bachelor's degree in mechanical engineering (or equivalent)
- Professional Engineer (PE / P. Eng) designation preferred, but not required
- 5+ years of mechanical engineering experience in mining, mineral processing, or heavy industrial construction projects
- Strong knowledge of design and installation of bulk material handling systems, rotating equipment, piping, and pumps
- Experience working with contractors / vendors
- Proficiency with design software (AutoCAD, SolidWorks, Plant 3D, or similar)
- MS Project Scheduler
- Excellent project coordination, problem-solving, and communication skills
- Strong commitment to safety and quality
- A valid driver's license
- A valid passport is required for international travel

Working Conditions

- Tucson office-based modeling work and field-based exploration / mine site duties
- Exposure to outdoor and mining environments, including open pit and underground settings
- May require FIFO / DIDO roster or extended stays during critical construction and operational phases

Why Join Us

- Play a key role in building mining and processing facilities from the ground up
- Work alongside a collaborative, safety-first team of professionals
- Be a part of a company committed to innovation, sustainability, and community engagement

What We Offer

- 401K plus company match
- Paid time off
- Health insurance
- Dental insurance
- Vision insurance
- Life insurance
