

**About Us – Mako Mining Corp** is a publicly listed gold mining, development and exploration company. The Company operates the high-grade San Albino gold mine in Nueva Segovia, Nicaragua, which ranks as one of the highest-grade open pit gold mines globally and offers district-scale exploration potential. Mako also owns the Moss Mine in Arizona, an open pit gold mine in northwestern Arizona. Mako also holds a 100% interest in the Eagle Mountain Project in Guyana, South America. **Mako US Corp (a subsidiary of Mako Mining Corp.)** owns the Moss Mine, an open pit gold mine in Arizona and also owns the Mt. Hamilton Mine in Nevada. Mt. Hamilton LLC is currently seeking a qualified person for the position of **Safety Manager**.

### **About this role – Safety Manager**

The Safety Manager is responsible for leading and managing Health and Safety programs at the Mt. Hamilton mine site. This role ensures compliance with federal, state, and local regulations and promotes a culture of safety throughout the organization. The Safety Manager will work closely with operations, maintenance, environmental, and human resources departments to implement the best practices and continuously improve safety performance.

### **Responsibilities**

- Develop, implement, and maintain site-wide safety policies, procedures, and training programs in compliance with MSHA (Mine Safety and Health Administration) regulations.
- Lead and promote a culture of safety excellence and proactive risk management.
- Conduct regular safety inspections, audits, risk assessments, and incident investigations.
- Serve as the primary liaison with MSHA and other regulatory agencies; ensure proper reporting and documentation of safety activities and incidents.
- Facilitate employee safety training programs including new hire orientations, task training, emergency response, and hazard recognition.
- Analyze safety trends and metrics to identify opportunities for improvement and track progress against safety goals.
- Develop and lead emergency response preparedness and drills.
- Ensure proper use, maintenance, and availability of PPE (Personal Protective Equipment).
- Collaborate with department leaders to ensure safety policies are effectively communicated and followed across all work areas.
- Manage site safety communications including toolbox talks, safety bulletins, and incident alerts.
- Participate in the development of mine operating plans and construction projects to ensure safety considerations are integrated from planning through execution.

*\*The above duties and responsibilities are representative of the nature and level of work assigned and are not necessarily all-inclusive.*

### **Qualifications and Skills**

- Bachelor's degree in Occupational Health & Safety, Industrial Hygiene, Environmental Science, or related field preferred
- Minimum 5 years of experience in safety management, with at least 3 years in mining or heavy industrial operations
- Strong knowledge of MSHA regulations and mine safety practices
- Demonstrated experience in conducting incident investigations, root cause analysis, and corrective actions
- Professional certification (e.g., CMSP, CSP, CHST) is an asset
- Excellent communication, training, and interpersonal skills

- Proficient in Microsoft Office Suite and safety management systems
- Ability to work in field conditions and lead by example
- Ability to build, lead and manage dynamic exploration teams
- Critical thinking and analysis skills
- Strong communication and leadership skills
- Ability to work in remote and challenging environments
- Valid driver's license
- Valid passport is required for international travel
